

# PRESCIENT IJG INCOME PROVIDER FUND A1

## MINIMUM DISCLOSURE DOCUMENT

### INVESTMENT AND RETURN OBJECTIVE

The Fund aims to return CPI + 3% per annum through a full interest rate cycle while providing stability by aiming never to lose capital over any rolling 3 month period. The Fund is Regulation 13 compliant and at least 45% is invested in Namibian assets.

### INVESTMENT PROCESS

This Fund invests in local and offshore money market, bonds, property, preference shares, inflation-linked bonds and derivatives to meet the investment objectives. Fund performance can be generated from taking interest rate views or duration, yield enhancement via credit instruments, asset allocation between income producing asset classes, offshore exposure and also via the use of derivatives.

### WHO SHOULD INVEST

The Fund is suitable for investors with a short to medium term investment horizon seeking a conservative risk offering that aims to maximise income via primarily investing in Namibian and South African money and bond markets.

### RISK INDICATOR DEFINITION

These portfolios typically have no or low equity exposure, resulting in higher interest yields and stable capital values with the probability of capital losses over the shorter term (3 months) highly unlikely. These portfolios typically target returns in the region of 2% – 3% above inflation before tax over the long term.

### RISK INDICATOR

PERFORMANCE (%)			RISK AND FUND STATS	
	Fund	Benchmark	Current	Fund
1 year	9.97	9.08	Yield (gross)	10.01%
Since incep.	7.57	7.53	Average Duration	1.28yrs
Highest rolling 1 year	10.14	9.08		
Lowest rolling 1 year	5.76	5.72		

All performance fees are net of fees.

## FUND COMMENTARY

June witnessed a repricing of interest rates locally, spurred by a more favourable global backdrop for risk, which coincided with a market-friendly election outcome. As a result, the local nominal Bond index ended the month up more than 5%. The Fund was ahead of its benchmark for the month, delivering strong performance. On the global macro front, recent communication from Federal Open Market Committee (FOMC) participants acknowledged substantial progress toward the committee's two percent inflation target over the past year, despite firmer-than-expected inflation readings in recent months. While some participants highlighted the broad-based nature of these inflationary increases, caution was expressed regarding the potential influence of residual seasonality on early-year inflation data. The market has adjusted to anticipate further interest rate cuts in the US and South Africa, in line with the more favourable global macro backdrop.

Given the movement in the SA yield curve, we continue to favour floating rate exposure in the 3-year area of the yield curve, with our fixed rate exposure concentrated in the 10-year area, where we perceive the greatest value considering the associated risk.

The Fund forward yield remains attractive at 10.01%. The Fund has an interest rate duration of 1.28 years.

The Fund was ahead of its benchmark for the month. We saw good contributions from all components of the portfolio, notably the duration position of the portfolio. The current risk in the portfolio aligns with the Fund's risk objective, and we see the Fund well positioned to achieve its return objectives.

### Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs.
